

Why Buy Replacement Windows Now?

Increase Your Home's Energy Efficiency!

Replacing [windows](#) in your home is a sizable investment. Fortunately, it is an investment which helps pay for itself through increased energy efficiency!

If you're interested in energy efficient windows look for the [ENERGY STAR](#) sticker. The Energy Star rating system has been in place for nearly 20 years and is a joint program of the Environmental Protection Agency and the Department of Energy. Energy Star qualified windows can reduce your energy bills up to 15% while helping protect the environment. [Contact our specialists](#) at Dial One today for a free estimate for your new energy efficient windows.

Other Long-Term Savings Tips

- Installing high-performance windows will improve your home's energy performance.
- While it may take many years for new windows to pay off in energy savings, the benefits of added comfort and improved aesthetics and functionality may make the investment worth it to you.
- Check with local utilities to see what rebates or other financial incentives are available for window replacement.

Shopping Tips for Windows

- High-performance windows have a least two panes of glass and a low-e (low emissivity) coating.
- In temperate climates with both heating and cooling seasons, select windows with both low U-factors (rate of heat loss) and low Solar Heat Gain Coefficient (SHGCs) to maximize energy savings.
- Have your windows installed by trained professionals,

You wouldn't live in a house without insulation, but you may be living in a house with holes in the wall that let out your heat in the winter and your air conditioning in the summer! If your house is more than a few years old, your original windows might as well be open all year-round, leaking your hard-earned money into thin air.

[Replacement windows](#) from Dial One Windows will help increase the energy efficiency of your entire home. One of the main offenders when it comes to energy lose is single pane windows. Just put your hand up to the window on a winter's day to find out why. Adding an extra pane of glass with double paned windows is the first step to increasing energy efficiency. Double paned windows also reduce noise coming in from nearby streets or businesses.

Our [replacement window](#) experts at Dial One can help you choose the right windows for your home, matching your design tastes and your budget! We feature Renewal by Andersen.

Plantation Shutters Bring Old World Grace

Bring the warmth of wood into your home with [plantation shutters](#) from Dial One Windows. This functional, yet elegant, style of window treatment evokes Southern charm and hospitality and will provide years of beauty in your living room, great room or even master bedroom.

Dial One Windows offers a wide variety of wood shutters so that you can create your own custom look.

Manufactured right here in California, our shutters are made from your choice of wood, including walnut, basswood, poplar, maple, cherry and mahogany, just to name a few of your options.

Plantation shutters are a good choice not only for their looks, but for their functionality, as well. They can be closed for privacy or to dim the room for daytime television watching.

1 cup water

Directions

Place all the ingredients in a large saucepan set over medium heat and bring them to a boil. Reduce the heat and simmer, stirring occasionally, for 15 minutes or until the cranberries burst. Remove from heat and refrigerate until cold, about 4 hours. The sauce will thicken as it cools.
