

Make A Good First Impression

A front door is often the focal point of a house. Compared to other highly visible parts of the house from the outside, like a roof, the siding or windows, the front door must make the best first impression as it ushers arrivals into the home. The front door is also a focal point in the interior of your home and it is often the last thing people see and will remember as they depart.

You want to make a statement and a good impression with your entry door. When deciding to install a new [entry door](#) for your home, you need to select one that is low maintenance, energy efficient and secure, in addition to being attractive.

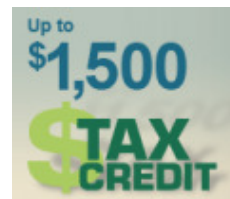

Things to Consider

When choosing a replacement door for your entry, you need to look at features like material, style, color and finish. Dial One Windows offers a wide selection of beautiful durable entry doors and security doors. They are custom made to order and can include beautiful decorative glass which allows natural light into your home. Our doors are built with quality craftsmanship for durability.

Coordinated Entryway System

Our entry doors system enables you to fully match or coordinate your entry and storm doors for a beautifully designed entryway. This uncommon feature extends to all facets of our product line. You can exactly match color palettes and paint/stain finish styles. Or you can choose complementing colors. Either way, you'll create an entry of lasting beauty.

[Contact us](#) today for a FREE in-home consultation. Our professionals can assist you with the selection of a door that fits your preferences and one that will integrate well into the look of your home. You may even qualify to receive [energy tax credits](#).

Don't Miss Out on Tax Savings!

2010 is a great year to maximize your return on investment in your home! Homeowners can qualify to receive up to \$1500 in federal [energy tax credits](#) for installing energy efficient home improvement products like replacement [windows](#), certain roofing shingles, [doors](#) and insulation.

But you need to hurry! This tax credit is set to expire at the end of this year and you need to have your product installed by December 31, 2010 to qualify.

Click here for a complete list of eligible energy tax credit products. Our Dial One Window professionals can also give you a FREE in-house quote to complete your home improvement project. [Contact us](#) today!

Drive Down Home Heating Costs

With a chill in the air now, most homeowners are worried about increased energy costs for home heating. Fortunately, there are a number of ways consumers can lower their energy bills. Find out what you can do to hold down your energy costs this winter.

- Caulk and weather strip windows, doors and anywhere else cold air can get in or warm air can get out.
- Set your thermostat as low as is comfortable. When you are asleep or out of the house, turn your thermostat back 10°–15° for eight hours. You'll save around 10% a year on your heating and cooling bills! (Tip: A programmable thermostat automatically lowers the temperature.)
- Buy products that have the federal government's "Energy Star" label.
- Repair leaks in faucets, particularly hot water faucets.
- Turn down the temperature of your water heater to the warm setting (120°F).
- Insulate hot water and heating pipes in areas that do not need to be heated (like the basement).
- Open curtains on south-facing windows during the day to allow sunlight to naturally heat your home, and close them at night to reduce the chill you may feel from cold windows.
- Wear warmer clothes, even indoors!

Dial One Windows is EPA Certified to Work on Older Homes

If your home was built before 1978, it mostly likely contains lead - based paint. Exposure to lead has been shown to be harmful to both children and adults.

Common renovation activities like sanding, cutting, and demolition can create hazardous lead dust and chips by disturbing lead-based paint. Dial One Windows has been EPA trained to safely handle lead exposure.

For more information about lead safety, [click here](#) or call us at **888-837-7084**.

Delicious Apple Crisp

Ingredients

Mix white sugar, cinnamon, and apples and put in a 9-inch loaf pan. In a separate bowl, mix brown sugar, flour and butter and sprinkle on top of mixture. Bake at 375 degrees for 30 to 45 minutes. Serve warm with a scoop of vanilla ice cream.

AMAZING!!
