An old entry door could cost you a fortune if it has outdated seals, poorly joined pieces, or is thin enough to allow air to seep through the door. This can cost your dearly in your heating and cooling. If you suspect your entry door is letting in too much outside air, it might be time to invest in [Dial One's quality entry doors](#). These doors are specially designed to minimize drafts through quality construction, superior seals, and polyurethane foam cores.

Stylish Appearance

Fads come and go. As the main focal point of your home, the front door is the lens through which people see the rest of your home. If your front door is leftover from a fad that left long ago, it can dramatically age the rest of your house. Dial One's doors, while being incredibly secure and energy efficient, are built with design and style in mind. Their quality construction comes in myriad colors and styles. [Let our design experts](#) help you find that perfect style that instantly updates your home's appearance!

Reduce Air Leaks for Greater Energy Efficiency

One of the simplest ways to monitor and improve the energy efficiency of your home is by searching for air leaks. Even small air leaks can dramatically affect your energy costs. Since there are so many low cost and easy ways to search for and fix air leaks in your home, there's little reason to let your expensive heating and cooling seep out of your house. The bigger the air leak, the more it will cost you in energy.

close to areas of suspected air leaks. If the candle flame flickers consistently, or the incense starts to track across the room, it's a good sign that you have an air leak.

There are plenty of products on the market that help with air leaks. From spray foam insulation to weatherization strips, there's sure to be a simple fix to air leaks, enabling you to keep your home comfortable all year round.

2 tablespoons olive oil
1 16 oz. can cannelli beans, drained
1 cup chicken broth
1/8th teaspoon crushed red pepper flakes
parmesan cheese for topping
salt and pepper to taste

In a saucepan sautee chopped escarole with 1 tablespoon olive oil and red pepper flakes. Cook for 10 minutes, or until escarole is tender.

In another saucepan, sautee garlic in remainder olive oil for two minutes. Add can of cannelli beans and chicken broth, and cook for 10 minutes, or until the beans start to become creamy.

After both pans cook for 10 minutes, add the escarole to the beans, and cook for another 10 minutes. Taste and add salt and pepper to taste. Serve sprinkled with parmesan cheese.
